\$15 - Day Rental
\$60 - Week

*Pricing subject to change

Overview

A sod roller is a manual tool used for pressing freshly laid sod or seed into the soil for proper contact. By rolling over the sod, it helps remove air pockets and ensures that the roots make better contact with the soil, promoting faster growth. It is also effective in evening out the surface for a smoother finish. Ideal for landscaping projects, garden installations, or after reseeding. The roller can be filled with water for added weight to achieve optimal pressure. Manual or attachment versions available.
