Propane Heater—65,000 BTU

Use this DeWalt forced air liquid propane heater to bring warmth you can rely on to fight tough, onsite work conditions. This heater uses liquid propane and burns at 65,000 BTU per hour but can be adjusted down to 35,000 BTU. Equipped with Quiet Burner Technology, it operates with 50% less noise than other similarly-sized units. Its recessed controls are designed to reduce risk of damage on jobsites, so this heater is ideal for work environments with temporary structures, like in tents or construction sites.

When operated with a 20 lb. liquid propane tanks, this heater can heat approximately 1,625 sq. ft. of space for around 7 hours on high or 12 hours on low. For easy ignition and operation, this heater has a continuous ignition and thermo-electric safety valve. This unit requires a liquid propane connection for operation.
