Propane Heater—400,000 BTU

The HeatStar 400,000 BTU Forced Air Propane Industrial Heater is designed to provide powerful heating solutions for large job sites and industrial spaces. With a capacity to heat up to 9,000 square feet, this heavy-duty propane heater is perfect for large construction sites, warehouses, and other demanding environments where reliable heat is essential. Built with rugged, durable steel construction, this heater is designed to withstand the rigors of tough jobsite conditions while offering efficient and clean-burning propane heat.

This propane heater operates between 250,000 and 400,000 BTU per hour, offering flexibility based on your heating needs. It includes a factory-installed high-limit switch for safety, ensuring the heater doesn't overheat, and a continuous solid-state ignition for reliable startup. With its high-output fan, this heater ensures even heat distribution across large spaces.

For ease of use, the HeatStar 400,000 BTU heater plugs into a standard 110v outlet, making it compatible with most job sites. The heater is not only powerful but also economical, providing efficient heat while running up to 17 hours on the low setting with two 100lb propane tanks. This makes it an excellent choice for those needing reliable, cost-effective heating solutions in challenging environments.
